Development

Our approach

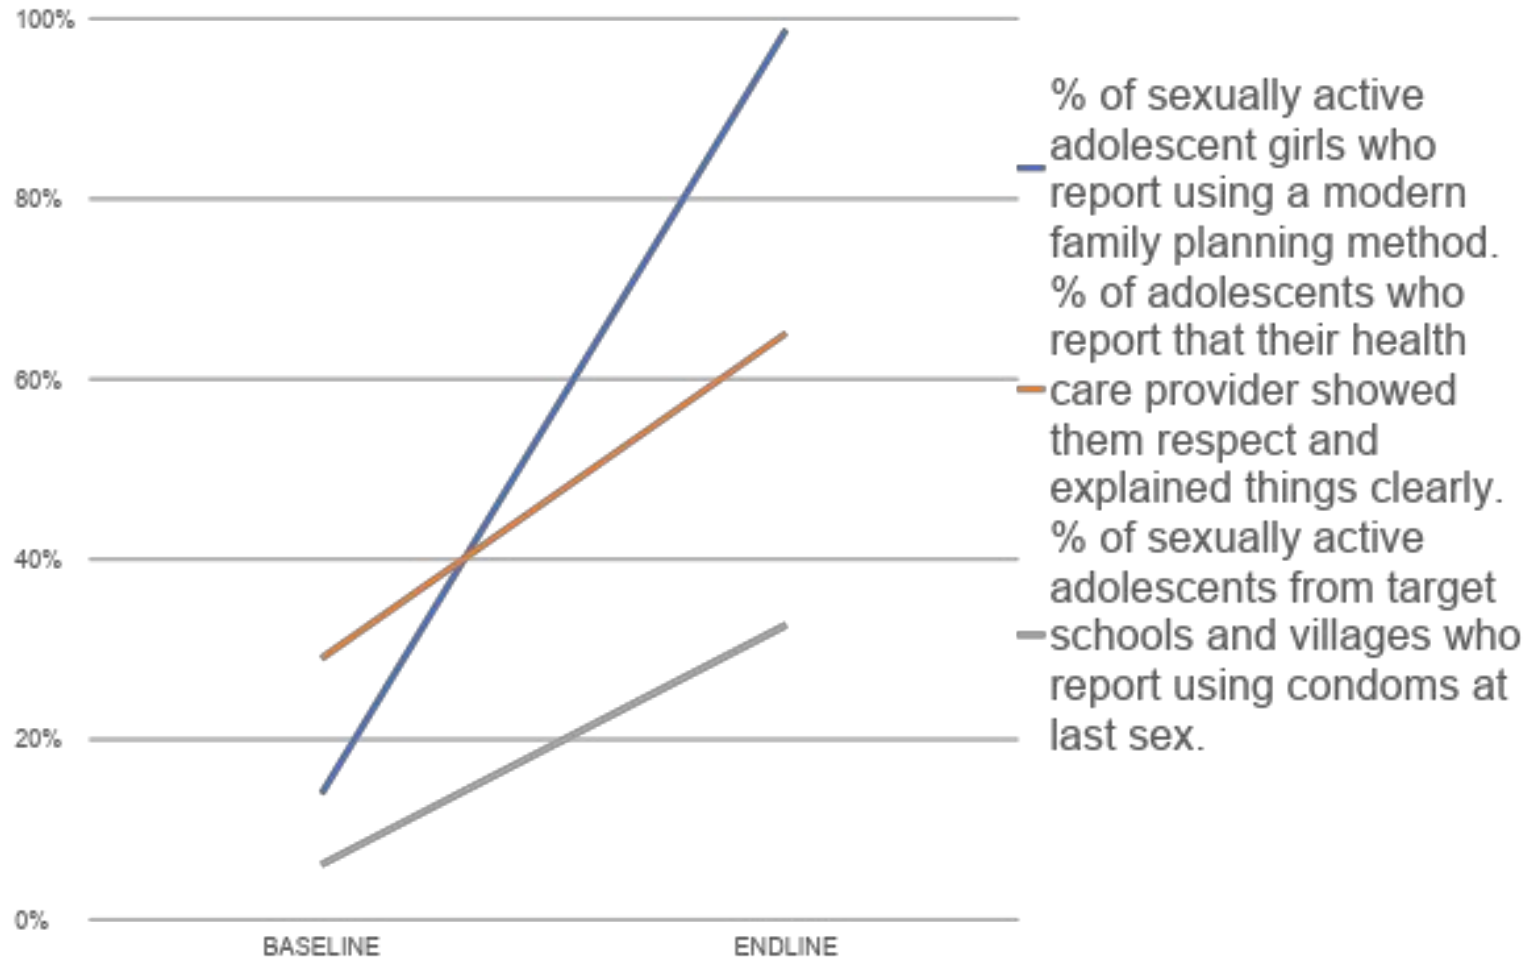

Impact

RANKING SCORE: 4/5

EFFECTIVENESS

1 1.5 2 2.5 3 3.5 4 4.5 5

Outcome Indicators

And perceptions
of reduced
teenage
pregnancies,
increased school
attendance,
reduced GBV

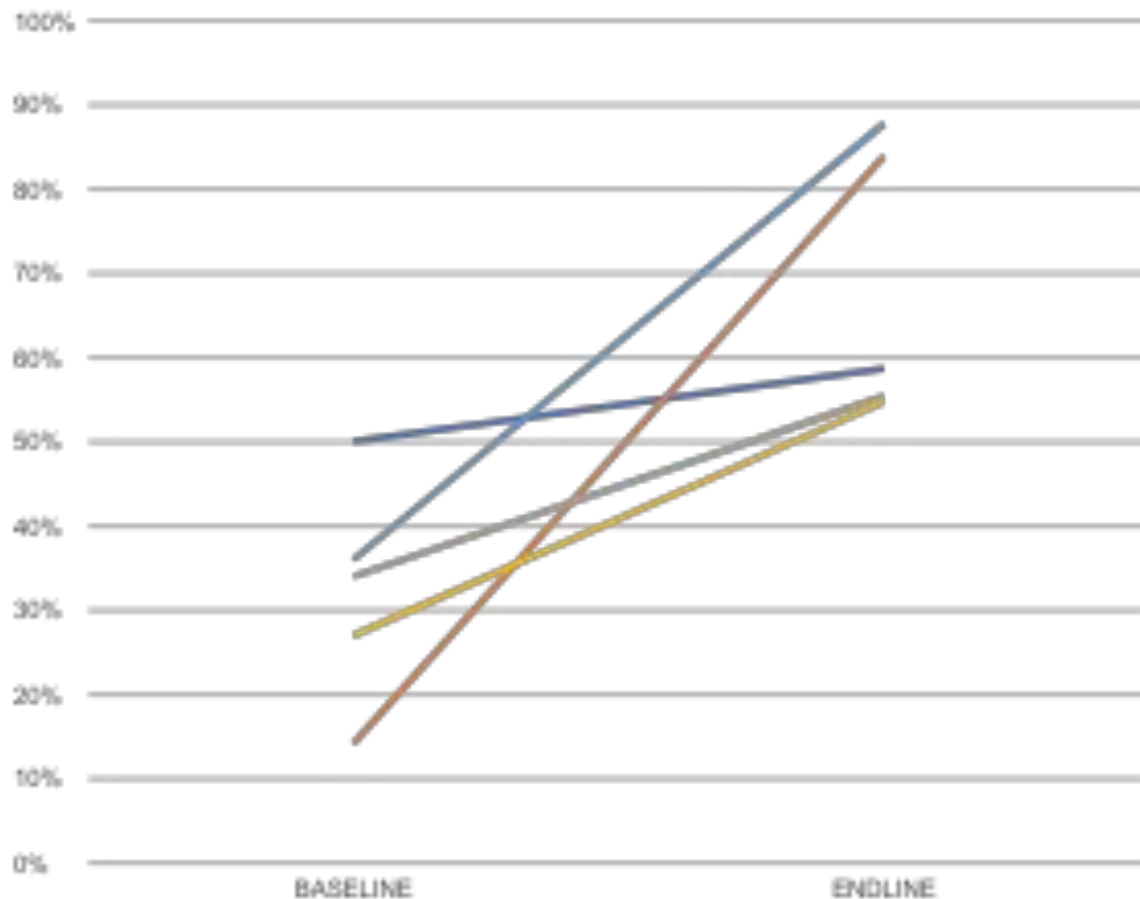

Effectiveness

RANKING SCORE: 4/5

IMPACT

1 1.5 2 2.5 3 3.5 4 4.5 5

Output Indicators

- % adolescents (14-19) who agree that "just because a girl had gone through Bondo does not mean that she is ready to be sexually active"
- % health workers demonstrating positive attitudes towards adolescents
- % community who agree that "just because a girl had gone through Bondo does not mean that she is ready to be sexually active".
- % adolescents whose parents have ever discussed sexual health matters with them (9-13)
- % adolescents whose parents have ever discussed sexual health matters with them (14-19)

Sustainability

Next time we
need better
follow-up in
communities to
maintain
momentum

An Ongoing Challenge

Increased demand for family planning goods and services but lack of *supply*
