

## 2022 Theme Humanity and Health: Reimagining Equity for All

The overall aim is to delve deeper into equity from the lens of humanity, compassion, and inclusiveness.

**Humanity** is defined by the Merriam-Webster dictionary as a **compassionate, sympathetic, or generous disposition**. The qualities that make us human, such as the ability to love and have compassion, be creative, and not be a robot or alien. It is the concept of human race, including everyone on earth - 'Inclusion', a global health concept.

With this in mind, the overarching goal of the Irish Global Health Network is that the communities we are fighting for, the farthest left behind, are brought to the forefront of global health debates, and decision-making processes. **For no community is void of knowledge and skills.**
